

We need a **pause** on AI in schools.

**Join us in demanding
a two-year pause
on AI in BC schools.**

aicaution.ca/petition

AI tools like ChatGPT are being put in classrooms across BC, without considering the negative effects on students' learning and mental health.

Studies and reports have already shown that:

- Students who use AI **learn less** and think less critically (Kosmyna 2025)
- Children can easily **become dependent** on and negatively influenced by AI chatbots (Dupré 2024)
- AI chatbots weaken responsible decision-making and **harm relationships** (Cheng et al 2026)
